Investment Philosophy:

Durand Capital Partners adheres to the philosophy that we call the "small p" and the "BIG P" of investing. The "small p" stands for participate while the "BIG P" stands for PROTECT. In our view, it is much more important to manage our strategies with an eye on capital preservation and risk mitigation than it is to focus on swinging for the fences. We feel that if we can minimize the draw-downs then we also minimize the need to be overly aggressive. Even if we end up being average in the good years, but are able to significantly mitigate the losses in the bad, over full market cycles our investors will be very well served.

This philosophy is enacted by looking to purchase individual equity securities of companies exhibiting above industry growth, profitability and financial health metrics. Once these companies are identified, we look to secure them at a price that provides for a substantial margin of safety, thus allowing us to adhere to our underlying conservative principles. Lastly, our ability to hold cash as an investment position in the portfolio further allows us to move up and down the risk spectrum as appropriate.
